

Zenia Gist

FULL STACK DEVELOPER

Profile

My objective is to create clean and readable code to maintain optimally functional websites and applications. In a competent web development team, I intend to generate maximum traffic to all projects by showcasing high-quality SEO content and platform-friendly navigation. I will achieve this by ensuring that the highest priority is fast load times and lag free interactions when launching a website.

Featured Projects

Rideshare Finder, zeniagist.com/portfolio/RideshareFinder/

Tech Specs: MySQL, PHP, JavaScript, jQuery, AJAX, JSON

- Rideshare app which uses form validation when signing up, logging in, and creating/editing rideshare trips
- User can set up a profile and view other user's upcoming trips, phone number, and intro stored in SQL database

Speed Reader, zeniagist.com/portfolio/SpeedReader/

Tech Specs: JavaScript, jQuery Mobile UI, HTML/CSS

- Speed reading IOS and Android app. Uses the jQuery Mobile UI to get user input text and displays one word at a time.
- User can change speed, pause, and reverse the word playback

Dine-In-Dash, zeniagist.com/portfolio/Dine-In-Dash/

Tech Specs: JavaScript, Bootstrap, HTML/CSS

- Healthy food delivery website with a selection of delivery cities, pricing plans styled with Bootstrap
